Howdy Ben,

Sorry this took so long, I got pulled away so much this week.

I took a look at the document. Everything in yellow, I can't really comment on (I'm not an expert at particulate inhalation hazards). I did write up a small blurb on radiation inhalation monitoring and how we will monitor airborne concentrations of rad. Feel free to read, edit, change anything you need that I have written. I want to double check some calculations for what I highlighted in pink but it should be ok. I still have a bit more work in getting the forms the way I want them but I've attached them if you want to include them in this document, as well.

Please let me know if you need anything else.

Hi Lyndsey,

Any chance that I will get back this document later today or tomorrow morning so that I can complete it for submission to Eric tomorrow. We are usually required to site documents to EPA prior to mobilizing to site.

Thanks,

**Ben Nwosu**

Eric/Lyndsey,

Please review the attached document and assist with providing action levels for air monitoring and air sampling. In addition, please include any pertinent narrative to clarify the proposed air monitoring/sampling strategy from a health physicist's

perspective. Some information in the attached document are highlighted in yellow for your attention.

See sections:

## **2.2 Basis for Establishing the Air Monitoring Action Levels**

### **3.1 Air Sampling Procedures**

### **3.2 Basis for Establishing Air Sampling Action Levels**

Please let me know if you have any questions.

Thanks,

**Ben Nwosu**

**Subject:** Niagara Falls Boulevard Site - Community Air Monitoring Program

Hi Lyndsey,

I am preparing a CAMP for the air monitoring and sampling activities at NFB. I would like your input as soon as I complete the draft. There are information that I am not familiar with from a HP's perspective. I may call you this afternoon just to get a sense of what additional information I could include on my own before sending it to you. You should receive it by COB today.

Thanks,

**Ben Nwosu**
